

Work Experience

Founder & Software Engineer

Hompimpa

Depok, Indonesia

Mar 2026–Present

Hompimpa is a software studio focused on delivering production-ready web, mobile applications and client solutions across multiple technology stacks.

- Architected and delivered **production-ready web and mobile applications** using **Node.js, NestJS, Next.js, and Flutter**, spanning full-stack development; designed **scalable RESTful APIs**, integrated databases, and consistently delivered features on time for multiple client projects.
- Owned end-to-end **CI/CD pipelines via GitHub Actions**; configured and maintained **Linux servers** and deployment workflows, ensuring **high system availability and uptime** across all client environments.
- Led **cross-functional sub-teams** through full project lifecycles; conducted **direct client requirements gathering**, technical discussions, and stakeholder alignment to ensure **on-time delivery** of solutions aligned with business needs.

Backend Developer

PT. Altimeda Cipta Visitama

Depok, Indonesia

Jan 2024–Present

PT. Altimeda Cipta Visitama is an Indonesian tech company delivering enterprise backend systems, AI-powered platforms, and ERP solutions for clients in Indonesia, Australia, and Japan(in 2026), including collaboration with ProjectedAI.

- Designed and delivered **high-throughput microservice architectures** using **Golang, Node.js, and NestJS** with **gRPC and Protobuf**, reducing inter-service latency by over **30%** compared to REST-only implementations; served enterprise clients across Indonesia and Australia.
- Built an **AI-powered document intelligence platform** integrating **OpenAI GPT APIs and HNSW vector search** to semantically process CVs, contracts, and product catalogs from **OneDrive, Google Drive, and Amazon S3**; achieved **sub-second query response times** across a corpus of thousands of enterprise documents.
- Engineered **ERP backend modules and secure enterprise API integrations** supporting multi-tenant business operations; managed **Microsoft Azure** cloud infrastructure including **deployments, auto-scaling, and cost optimization**, reducing monthly cloud spend by approximately **20%**.
- Collaborated with the Australian partner **ProjectedAI** on cross-border projects, participating in **international sprint planning, architecture reviews**, and technical handoffs across time zones to ensure seamless delivery.

Backend Developer (Apprenticeship)

PT. Telkom Indonesia

Jakarta, Indonesia

Feb 2023 - Jul 2023

PT. Telkom Indonesia is Indonesia's largest state-owned telecommunications and digital services company, with over **150 million subscribers** and a workforce of over 25,000 employees, operating across telecommunications, internet, and digital ecosystem services nationwide.

- Developed and maintained **RESTful APIs and backend services** for Telkom's internal **Sustainable Talent Nurturing Program** web portal, serving **hundreds of active users** across the DPE division; handled **server provisioning, environment configuration**, and production deployments.
- Collaborated within a large agile team at one of **Indonesia's largest state-owned technology companies**; gained hands-on experience with **enterprise-grade development practices, code reviews**, and production-level service monitoring in a high-scale environment.

Backend Developer

Waithub (formerly Antrique)

Bandung, Indonesia

Jul 2022 - Sep 2022

Waithub (formerly Antrique) is a Bandung-based tech startup specializing in **face-to-face service innovation**, offering a comprehensive suite of virtual queuing systems, time delivery analytics, targeted advertising, and secure payment services for businesses across Indonesia.

- Designed and developed a **scalable RESTful API in Golang** powering a virtual queuing, time analytics, and payment services platform; containerized all services with **Docker** and deployed to **AWS** via automated **GitLab CI/CD pipelines**, ensuring zero-downtime releases.
- Optimized API endpoints to handle **concurrent queue management** and **real-time analytics** for face-to-face service delivery across multiple business clients; contributed to **secure payment service integration** and advertising module development.

Education

- **B.Sc. Computer Software Engineering (GPA: 3.78/4.00, Cum Laude)**, Universitas Telkom, Indonesia

Technologies and Skills

- **Languages:** Node.js, Golang, TypeScript / JavaScript, Dart (Flutter), Python
- **Backend:** Express, Fastify, NestJS, REST APIs, gRPC, Protobuf, GraphQL, WebSocket, Microservices
- **Frontend:** React, Next.js, Flutter, Tailwind CSS, HTML5, CSS3
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Pinecone, Vector DB (HNSW)
- **AI & Integrations:** OpenAI API, Claude API, Gemini API, Midtrans, Google Drive API, OneDrive API, Amazon S3
- **DevOps & Cloud:** Docker, GitHub Actions, GitLab CI/CD, PM2, Nginx, Microsoft Azure, GCP, AWS, Linux server admin
- **Tools & Practices:** Git, Postman, Swagger/OpenAPI, Agile/Scrum, Code Review, System Design, Technical Documentation

Projects & Achievements

- **Graduated Cum Laude** from Universitas Telkom with GPA 3.78/4.00 (2023)
- **Patent of Website Telyukost** – a platform for online board ordering and search services at Telkom University (2023)
- **Winner** – Unibi Technology Competition Regional Contest (2019); 3rd Place – Invofest National Contest (2018)
- **Best Student of Software Engineering 2019** – Medikacom Vocational High School
