I'm an experienced back-end developer with a strong passion for building AI-powered systems and creating efficient RESTful APIs. My background includes developing and optimizing databases, integrating advanced technologies such as Natural Language Processing (NLP), and extensive work with Node.js and Docker. Proficient in various programming languages, I thrive on crafting innovative solutions that improve user experiences and simplify complex workflows. My journey in technology is driven by both rigorous academic learning and hands-on projects, and I continuously seek opportunities to push the limits of software development.

Work Experiences

Hompimpa - Depok, Indonesia

Mar 2026 - Present

Founder & Software Engineer

Built and maintained multiple web applications using Node.js, NestJS, and Next.js, covering both backend and frontend development. Responsible for designing scalable RESTful APIs, integrating databases, and delivering production-ready features for various client projects. Managed CI/CD pipelines using GitHub Actions, configured and maintained Linux servers, and handled deployment workflows to ensure reliable system performance and uptime.

Led and coordinated sub-teams during project development, conducted technical discussions, gathered requirements directly from clients, and collaborated with stakeholders to deliver solutions aligned with business needs. Also involved in project planning, troubleshooting production issues, and improving development workflows and infrastructure.

PT. Altimeda Cipta Visitama - Depok, Indonesia

Jan 2024 - Present

Backend Developer

Build scalable backend services, RESTful APIs, and enterprise solutions using Golang, Node.js, and NestJS. I also work with gRPC and Protocol Buffers (Protobuf) to develop efficient microservice architectures.

My work includes developing AI-powered systems integrated with OpenAI technologies and the HNSW algorithm for fast similarity search. The platform connects with OneDrive, Google Drive, and Amazon S3 to process and manage documents such as CVs, contracts, and catalogs using SQL and vector databases to generate contextual responses based on uploaded knowledge.

In addition, I contribute to ERP development and enterprise integrations by designing secure APIs and backend services that support business operations. I also manage Microsoft Azure cloud infrastructure, including deployments, monitoring, and resource optimization to ensure scalable and reliable systems. Most of the projects and clients I work with are based in Indonesia and Australia, including collaborations with the Australian company ProjectedAI.

PT. Telkom Indonesia - Jakarta, Indonesia

Feb 2023 - Jul 2023

Backend Developer

Join development in team after finish apprenticeship to work in real case in Telkom Indonesia. Work in DPE team to handle web portal for internal Telkom Indonesia to manage internship program called sustainable talent nurturing program. In DPE team my task is create and maintenance RESTful API, setting and manage server, then deploy services to server.

Telyukost - Kab. Bandung, Indonesia

Feb 2023 - Jul 2023

Backend Developer

Founding Telyukost for an undergraduate thesis. Telyukost is a platform that focuses on search services and online board ordering and is based at Telkom University. The main job description that I do is to create RESTful APIs in Node.js, initiate and maintain the GCP server, deploy services, including FE and BE services, using Docker, and monitor all services that are deployed on the server.

Waithub (Formerly Antrique) - Bandung, Indonesia

Jul 2022 - Sep 2022

Backend Developer

Antique specializes in providing innovative face-to-face service solutions, offering a comprehensive suite of virtual queuing systems, time delivery analytics, targeted advertising, and secure payment services. My role involves developing and maintaining a scalable Restful API architecture in Golang, ensuring seamless deployment to AWS servers via CI/CD pipelines on GitLab. Additionally, I oversee the containerization and orchestration of our services using Docker, optimizing our infrastructure for high availability and efficiency.

Informatics Laboratory Telkom University - Bandung, Indonesia

Aug 2022 - Jul 2023

Laboratory assistant

Responsible for supervising the operation of all practicum activities in the Faculty of Informatics, managing the informatics labs website on servers and locally, recruiting practicum assistants for two semesters, evaluating the performance of practicum assistants, and holding a special responsibility for practicum web and mobile development.

Informatics Laboratory Telkom University - Bandung, Indonesia

Aug 2021 - Jul 2023

Practicum Assistant

As a Practicum Assistant across various development domains, I played a key role in conducting assessments and guiding practitioners in practicum implementation. I successfully fulfilled responsibilities in multiple courses, including mobile development using Flutter, web development with CodeIgniter, and API development. My experience extends to teaching basic algorithms, programming with Go, software construction with C#, and object-oriented programming with Java. Through effective communication and leadership skills, I ensured successful course delivery and met learning objectives across diverse technology stacks.

Education Level

Universitas Telkom - Bandung <i>Bachelor of Computer Software Engineering, 3.78/4.00</i> Graduate with cum laude predicate	Sep 2019 - Nov 2023
Medikacom Vocational High School <i>High School Diploma in Software Engineering, 87.00/100.00</i> Awarded As Best Student of Software Engineering at 2019	Feb 2016 - Aug 2019

Organisational Experience

Proclub - Bandung <i>Software Engineering Member</i>	Sep 2019 - Aug 2023
Informatics Labolatory of Telkom University - Bandung <i>Labolatory Assistant</i>	Aug 2022 - Jul 2023
Himpunan Mahasiswa S1 RPL Telkom University - Bandung <i>Management Organization</i>	Feb 2022 - Feb 2023
Alogical Backend - Bandung <i>Lead Programmer External</i>	Jan 2018 - Jan 2021
Computer Creative - Bandung <i>Member</i>	Sep 2017 - Jul 2019
BITCOM (Bandung IT Community) - Bandung <i>Member</i>	Sep 2018 - Mar 2019
RPL Indonesia - Bandung <i>Member</i>	Feb 2019 - Jan 2023

Skills, Achievements & Other Experience

- Achievements** (2023): Graduated from Telkom University with cum laude predicate
- Projects** (2023): Patent of Website Telyukost
- Projects** (2022): BAP Website of Informatics Laboratory
- Projects** (2022): Informatics Labolatory TV
- Projects** (2020): Covid-19 Report Website
- Projects** (2020): Aurora Project
- Achievements** (2019): Winner in Unibi Technology Competition Regional Contest
- Achievements** (2019): Awarded As Best Student 2019 At Medikacom Vocational High School
- Projects** (2019): Money Management Mobile App
- Achievements** (2018): 3rd Place In Invofest 2018 National Contest
- Projects** (2018): Apotek Cashier Apps
- Projects** (2018): Cashier App at PT. Tirta Kencana Alam
- Projects** (2020): Waranti Sparepart Management
